

Are you getting the Outcomes you deserve?

BODY:

Dear {First name},

Think staffing agencies can only help with Direct Hire and Temporary staffing? While Cutting Edge Recruiting Solutions offers this help, sometimes all you need is an **Outcome**: a project finished, new technology deployments, or an application built from scratch.

Using Outcome-based Project Staffing

What is the concept of using outcome-based project staffing?

- **Department build-out or relocation** – Need to build a specialized department without the cost of hiring full-time staff? Relocating your team and need to build out in a new location?
- **Support team** – Whether you need limited or full support, we can help.
- **Software conversion** – Converting to new software when you don't have the internal resources to make the process seamless without sacrificing current projects.
- **Advanced technology** – Infrastructure initiatives, data center upgrades, audits, unified communications, virtualization, storage, SFDC customization, Amazon AWS initiatives, and too many more to list.

Companies often pass up opportunities either due to a lack of resources or when the expense required to build out the resources outweighs the return on investment. We offer an efficient solution:

- **Instant bursts in productivity when you need it**
- **Reduced overhead for skills you only need occasionally**
- **Innovation without distraction from running your business**
- **Quicker results with highly skilled experts**
- **Fully funded programs that serve as bridge loans (pending credit)**

Outcome-based project staffing is designed to give you the flexibility to outsource partial or entire parts of your projects. You benefit from a team that comes with proven skills to achieve your desired results. You receive workers who possess specific skill sets and experience anytime you need them.

With outcome-based project hiring, your core group of employees continues to maintain the focus on their roles without loss of productivity. It's also scalable, so you employ teams whenever you need them—whether it's for small projects or part of larger overall initiatives.

At CERS, we will assemble a team of workers with specific, verified skills to meet your budget and timing requirements. All teams can include a CERS project lead who reports back to the department head, and who spearheads communications with the project team. Our team can take care of all the details, from A to Z.

Putting outcome-based project staffing to work for you

We believe that a company's foundation is solid staff.
